- ✓ Organize your data in a methodic way
- ✓ Build visuals to make your performance review process much more efficient
- ✓ Transform your data table into a decisional tool

4th & 5th of February 2010

from 9:00 till 17:00

at Cockpit Group's office

2 av. Jules César – 1150 Brussels

Learn about the 10 best practices to develop your decisional dashboard with Excel

Cockpit Group is specialized in the definition, implementation and automation of key performance indicators (KPI's). We help companies to improve their performance by providing them with measurement processes & tools, supporting them in their decision making process based on visual KPI's.

Companies like **Accor**, **Siemens**, **AGC Europe** (ex-Glaverbel), **Chiquita**, **ORES...** and several SME's like **WIN**, **BIA**, **Curver**, **Cetrel**, **Design Board**, ... have trusted our approach to define and implement their decisional dashboard.

Registration (before 1st of February)
